

LE THANH TAN

Internship fullstack Developer

SUMMARY

Final-year Software Engineering student with a strong foundation in Full-Stack Web Development (Spring Boot, Node.js, ReactJS) and Mobile Development (Android/Kotlin). Experienced in integrating AI services into production-grade applications. Seeking a Full-Stack Developer Internship position to contribute to scalable corporate software projects and further refine development skills.

EDUCATION

Ho Chi Minh City University of Technology and Education (HCM-UTE)
Major: Software Engineering (Senior / Final-Year Student, 2023 – 2027)
Current GPA: 3.35 / 4.0

TECHNICAL SKILLS

Languages: Java, JavaScript / TypeScript, Kotlin, Python, SQL.
Backend & Mobile: Spring Boot 3, Node.js / Express.js, Android (Jetpack Compose, MVVM, Clean Architecture)
Frontend: ReactJS, Redux, Tailwind CSS, HTML5 / CSS3
Databases & Tools: MySQL, SQL Server, MongoDB, Git, Postman, Docker, Cloud Services
Languages: Professional Technical English (Reading & Documentation Comprehension)

PROJECTS

- E-Commerce Clothing Website - Team Project

Dec 2025

Technologies: Java 17, Spring Boot 3, Spring Data JPA, Spring Security, Thymeleaf, SQL Server, Cloudinary API, Google OAuth2.

Role: Backend Developer & Frontend Developer

Developed a full-stack e-commerce web app supporting 4 roles (Admin, Seller, Shipper, Customer) with complete purchase, cart, and order tracking workflows. Implemented variant product management (size, color), Google OAuth2 authentication, Spring Security authorization, and Cloudinary cloud storage.

- IT Human Resource Management System - Team Project

Mar 2026 – Jun 2026

Technologies: ReactJS, Redux, Tailwind CSS, Node.js, Express.js, MySQL, Sequelize ORM, Google Gemini API, Face-api.js.

Role: Backend Developer

Built a comprehensive multi-role HR platform automating time tracking, payroll calculation, and digitized recruitment workflows. Integrated Google Gemini AI for automated CV data parsing and HR Chatbot, along with facial recognition (face-api.js) for attendance tracking.

- AI-Powered English Learning Mobile App - Team Project

Mar 2026 – Jun 2026

Technologies: Android (Kotlin, Jetpack Compose, Hilt, Room, Retrofit), Node.js, MySQL, Google Generative AI, SM-2 Algorithm.

Role: Frontend Developer & Chatbot Developer

Developed a mobile application using MVVM and Clean Architecture with Spaced Repetition (SM-2) for vocabulary retention and offline data sync. Integrated Google Gemini AI for dynamic topic vocabulary generation, intelligent background study reminders, and progress tracking (Streak, Accuracy)

- Automated Google Form Filling Tool - Personal Project

Aug 2026

Technologies: Node.js, Express.js, Puppeteer (Headful Chromium), WebSockets, REST API, Levenshtein Distance Algorithm.

Built a web tool utilizing Puppeteer and WebSockets for real-time automated Google Form filling across 8 question types and multi-page forms. Applied Levenshtein Distance for fuzzy question-answer matching and engineered a Human-in-the-Loop mechanism to pause on CAPTCHA/validation errors.
