

NHUT DAO MINH

QC Engineer Internship

OBJECTIVE

As a final-year Software Engineering student, I am seeking a QC Engineer Internship to translate my academic foundation in software testing into practical impact. My objective is to proactively identify defects, optimize system quality, and elevate user satisfaction. I firmly believe that exceptional software is not defined by the absolute absence of bugs, but by how perfectly it fulfills user requirements and delivers real value.

PROJECTS

QA/QC Tester

// 06/2026 - 07/2026

Project: Software Testing - IT Human Resource Management System (Academic Project)

- **Achievement:** Completed the Software Testing course with an outstanding final grade of 9.4/10. | Members: 04.
- **Responsibilities:**
 - Analyzed requirements, contributed to system specifications and modeling to thoroughly understand business logic.
 - Designed and executed White-box testing (Control Flow Graphs, Cyclomatic Complexity) to validate core system algorithms.
 - Researched and applied bug management tools (Jira) to document, report, and track software defects effectively.

Full-stack Developer

// 06/2026 - 07/2026

Project: IT Human Resource Management System (Academic Project)

- **Tools:** React.js, Node.js, Express.js, MySQL, Sequelize, Tailwind CSS, Gemini AI | Members: 04.
- **Github:** https://github.com/thanhtanmt2/nhom4_BaiTap02-06-05-2026.git
- Developed a comprehensive, role-based HRM platform to manage employee records, track KPIs, and automate payroll calculations across 5 distinct access levels.
- Built a robust Node.js/MySQL backend, integrating Gemini AI for automated CV screening and face-api.js for facial recognition attendance.

Full-stack Developer

// 05/2026 - 06/2026

Project: MinLish - English Learning App (Academic Project)

- **Tools:** Kotlin, Jetpack Compose, Node.js, Express, MySQL, Gemini AI, Room DB | Members: 05.
- **Github:** <https://github.com/thanhtanmt2/English-learning-app.git>
- Developed an Android app (Kotlin & Jetpack Compose), integrating the SM-2 algorithm and Gemini AI for smart vocabulary generation.
- Built a Node.js & MySQL REST API with JWT/OAuth2 authentication, featuring offline data synchronization via Room DB.

CERTIFICATIONS

- Certificate of Completion in Software Testing – FPT Software

EDUCATION

- **Ho Chi Minh City University of Technology and Engineering (HCM-UTE)**
- Major: Software Engineering
- Final-Year Student (Expected Graduation: 2027)
- Current GPA: 3.54/4.0

SKILLS

Technical Skills:

- Testing Fundamentals: SDLC, STLC, Bug Life Cycle, Manual Testing.
- Test Case Design: Requirement Analysis, Test Scenarios, AI-Assisted Testing.
- API & Database Testing: RESTful API Testing, SQL Queries & Validation.
- Programming Background: ReactJS, Node.js, Java, Kotlin, SQL Server, ...

Tools & Frameworks:

Jira, Postman, Swagger, Git/GitHub.

Soft Skills:

Problem-Solving, Teamwork, Logical Thinking, Time Management Skills.

LANGUAGE:

TOEIC 615 (Good reading & technical documentation Comprehension).
